Stat Crew Software NOTICE - August 2022 Final Version and Change in XML Activation

After more than 25 years in business, Stat Crew has released the Final Version of its in-game scoring software. The Final Version is now available for purchase and download via the [Stat Crew online store](http://www.statcrew.com).

Important Change: pricing remains the same (\$399 per sport), but the license will include XML for live stats through July 2025 (3 seasons). After July 2025, there will be no further XML activations. The software will continue to operate normally beyond 2025, for in-game scoring, running reports, updating career records, and live HTML. Only live XML will expire after July 2025. We remind users to download and safeguard the install modules (approximately 30 MB per sport), and serial numbers for future re-use.

As part of this final version, the NextGen application and cloud platform have not been renewed.

In December 2022, online ordering and downloading of software will be discontinued, so please purchase and download all software for fall, winter and spring seasons before then. Also in December, our online, phone and email support of the software will wind down.

Please contact Stat Crew Software Customer Support before December 2022 for assistance with placing orders, or questions about the upcoming changes at support@statcrew.com or 513-771-4192.

We are working with the SID community to maintain our knowledge base of articles, user guides, reference cards, etc., for your future use. Check the SID Scoring Assistance facebook group for information after December 2022.

We are grateful for the enormous support of our customers and proud of the service we have provided over the years. To the many scoring crews and organizations around the world who have relied on Stat Crew for accurate game data, thank you for your partnership.
