

Maintenance Updates

Minor changes/enhancements are made occasionally to Stat Crew Software products. When such a change is made to a product, it is referred to as an "Update", and is designated by a new last digit of the version number. For example, if the current version of a product is 4.16.1, the next update will be version 4.16.2.

Note: Updates can be released at any time and are available for download from the Stat Crew website by any user. Go to: www.statcrew.com and select Maintenance Updates.

Users need the serial number from the current version to obtain the latest update. Then follow the directions displayed on the download page.

Control Panel

The Stat Crew Software Control Panel allows you to launch all STAT CREW applications from one icon on your Windows desktop.

The Control Panel is available for download from the Stat Crew website by any user. Go to: www.statcrew.com and select Control Panel.

To install the Control Panel from CD-ROM: Select Control Panel from the installer menu.

TasComms 32

TasComms32 (or "TC32") is a tool that supports serial (COM) port communications for Stat Crew scoring products. TC32 creates serial output during a game for media stats display and for scoreboard statistics.

To download TC32 from the internet, go to www.statcrew.com and select Download software fixes.

To install TC32 from CD-ROM:
From the CD, select TASComms32 from the installer menu.

To run TC32:
Select Start | Programs | TasComms32 | TasComms32 to start the program; or
Click on the STAT CREW Control Panel from your Windows desktop; select Tools; then click on TasComms32 (or right click to choose between TC32 and the original TasComms tool)

To display or print the User Guide, select Start|Programs|Tascomms32|User Guide

Note: TasComms32 User Guide is provided in Adobe Acrobat (PDF) format.

TasFTP

TasFTP is a tool that provides play-by-play updates to your web site during a game when using the "Live Stats" feature in Stat Crew Software products.

To install TasFTP from CD-ROM:
From the CD, select TasFTP from the installer menu

To display or print the TasFTP User Guides:
Select Start | Programs | TasFTP | User Guide - Baseball/Softball (Basketball, etc.)

Note: The TasFTP User Guide is provided in Adobe Acrobat (PDF) format.

TasZip

TasZip is a “zip/unzip” (file compression) tool for use with STAT CREW SOFTWARE scoring products.

Key features include:

- Faster and smaller backup/restore of games directories
- Useful for “larger” games directory backups that may otherwise require more than one storage device
i.e.: Backups of season or conference/league games directories
- Preview HTML files (prior to posting to your web site)
- Zip/Unzip files are compatible with PkZip, WinZip, NetZip
- Email “zipped” roster and game files

To download TasZip from the internet, go to: www.statcrew.com and select Download software fixes.

To install TasZip from CD-ROM:

From the CD, select TasZip from the installer menu

To run TasZip: Select Start | Programs | TasZip | TasZip to start the program; or

Click on Stat Crew Control Panel from your Windows desktop; select Tools; then select TasZip.

To display or print the User Guide, select Start | Programs | TasZip | User Guide. It is provided in Adobe Acrobat (PDF) format.

TasFonts

TasFonts provides a set of alternative fonts that can be used in Stat Crew Software reports. In particular, the “Lucida Sans Typewriter” font gives you a crisper, easier-to-read printout than the standard “Courier New”, making it a good choice for reports that will be copied or faxed.

To download TasFonts from the internet, go to: www.statcrew.com and select Download software fixes.

To install TasFonts from CD-ROM:

From the CD, select TasZip from the installer menu

Note: After installing TasFonts, you can select Display | Font settings from any of the Windows Reports menus to select a new font for your reports. To preview and test the look and feel of these alternative fonts, select Start | Programs | TasFonts | TasFonts

Electronic Scoreboard Interface

Stat Crew Software supports the sending of stats to an electronic scoreboard during a game.

To install the Electronic Scoreboard Interface files from CD-ROM:

From the (scoring software) CD, select Scoreboard from the installer menu

To display or print the documentation:

Select Start | Programs | TAS For Baseball/Softball (etc.) | Scoreboard interface

The following sample files are included on the CD:

board.xmp - a sample scoreboard output captured to a file

board-dk.xmp - same as board.xmp except with Daktronics end-of-data indicator (0x04)

box.xmp - an ASCII box score corresponding to the data in board.xmp.

The Electronic Scoreboard Interface document is provided in Adobe Acrobat (PDF) format.
