<u>Send live tournament update (FTP)</u>: Click to transmit a live tournament update (requires TasFtp). <u>View tournament update Html</u>: Click to view the local tournament update Html file in your browser. <u>Home logo</u>: Optionally enter the home logo image reference to insert into the Html file. <u>Visitor logo</u>: Optionally enter the visitor log image reference to insert into the Html file. <u>Indicate tournament is 'Final'</u>: Enable this option to display "FINAL" on the Html page.

<u>Indicate tournament is Final</u>: Enable this option to display "FINAL" on the Html pa

<u>FTP host name</u>: Enter the host name or IP address of the FTP server.

FTP userid: Enter the FTP login userid.

FTP password: Enter the FTP login password.

Directory: Enter the directory to transmit the live tournament update to.

Note: To use the "Send live tournament update (FTP)" function you must have TasFtp installed. Alternatively you can use the "View tournament update Html" function and use a local FTP tool to transfer the updated Html file to your server.

After setting up FTP information, use the following procedure to post live tournament updates:

1. Use the Player scores and Team scores pages to update tournament scores.

2. Click on Reports | Send live tournament update (FTP) to transmit the updated scores.

Sending to multiple sites

TasFtp can now transmit a primary site/server, and to a secondary site. To do this:

For the Html site select Game Reports | Live | Live setup. Supply the FTP settings for the primary FTP site. Then run Start | Programs | TasFtp | TasFtp, click the "2nd FTP site" button, and supply the FTP settings for the secondary FTP site. Check the "Enabled" button to make this setting active.

TasFip2 (Varsion 3.8.4. Jan 23.2007 Copyright 1995 Alex Grim. All rights re Secure FTP (SFTP) Capable. Local time 5/7/2007 4:22:59 AM	l 🔳	
	Transmit files (now)	E TFreep

game ID: xmlid			

Sending Html and Xml

TasFtp can now transmit Html to a primary site, and Xml to a secondary site. To do this:

For the Html site select Game Reports | Live | Live setup. Select the "Html" format and supply the FTP settings for the site to receive the Html-format output.

For the Xml site enable the Live | Live setup | XML output | Enable XML stats feed option. Then run Start | Programs | TasFtp | TasFtp, click the "2nd FTP site" button, and supply the FTP settings for the site to receive the Xml-format output. Check the "Enabled" button to make this setting active.
