Legacy Version 5.20 (Available July 2018)

- *Access to all updates from July 2018-June 2019 (ie versions 5.20.01-5.20.xx)*
- *Live XML activation through July 2019*
- *Updated NCAA team codes*

What's New 2000-2017:

Version 5.19.01-5.19.06 (Updates made July 2017-May 2018)

- Season Reports: Use value in Html|Setup|Html-Tags on teamstat.htm page to allow for <html lang="">
- Career Reports: Use value in Html|Setup|Html-Tags on histstat.htm page to allow for <html lang="">
- Updated NCAA team code list

Version 5.18 (2016)

- Game Reports: Fix to allow "Cancel" from Display | All selected
- Season Reports: Fix to misformat of Individual Season Statistics report after generating HTML

Version 5.17 (2015)

- Season Reports: Add TB and LOB columns to tap-stop output for team and opponent game-by-game
- Conference Reports: Add home/away/neutral record to Standings 'style' outputs and StatEdit mode
- Sort by team name in Tour/Conf|Team analysis
- Conference Reports: Add Settings|Select class/year to filter by FR, SO, JR, SR
- Tour/Conf|Player overall report now uses "Select class/year" setting
- Fix to NCAA|Media report usage of "Select class/year" setting

Version 5.16 (2014)

- Add "1L" and "3L" breakdowns to the following:
  Season Reports|Cumes|Analysis database|Pitch chart reports|Pitch count reports (Base hits where)
- Career Reports: Move "Delete game records for..." on the Edit game records to use Delete "All for..." checkbox
- Include player single-game highs in "Delete game records for..." function
- Career Reports: Improved all-time results editor NCAA code lookup
- Career HTML: Add links to seasons within All-Time results
- Career HTML: Display extended name in Individual career summary (HTML 'style' format)
- Add total bases and left on base columns to both teams in Game-by-Game report
- Treat game with Schedule Note: "V" as vacated game – Statistics count, but no win or loss credited
- Season HTML: Add links to individual game-by-game page from season statistics page
- Add all-time ranking indicator for single-game records to Individual|Career History report
  (Only displayed if ranking is within range of Records report settings|# entries for Game records value)
- Fix to pitch count narrative display on Hit by Pitch (HBP) actions
- Add hitting and pitching situation statistics to season XML output
- Include schedule legend in results capture for archives
- Include schedule notes for Next Gen archives
- Add pitchers' hit batters category for Individual and Team single-game records
- Add a change to preserve changes to previous game records' minimum settings

          (513) 771-4195
www.statcrew.com
@Stat_Crew

Version 5.15 (2013)
• Add Combined Stats option to Display|All selected setting
• Add link index at top of Individual career summaries (all years) section
• Use player names for Individual career summaries internal page markers (to simplify links from bio pages)
• Add TB and LOB to team and opponent game-by-game reports ('style' modes only)
• Sort non-starters in Pre-game report by uniform number
• Display 'style' images in NCAA|Media and Tour/conf standings reports
• Include players with GP but no stats in Career reports|HTML|XML (by player) indiv.xml output
• Credit pickoff to pitcher on unassisted play (1UA PO)

Version 5.14 (2012)
• New 'style' format for Pre-game report
• Remove extraneous lines from Career HTML|XML (by players) output
• Add "Lookup team codes" function to XML output window for single-game reporting
• Sub-sort conference standings by overall WLT percentage

Version 5.13 (2011)
• Season reports: Add "Reached base streaks" category to Miscellaneous report
• Add height and weight to Cumes|Roster report for XML format and tab-stop outputs
• Add Support for entry of career-totals-only statistics (career totals for a player, without season-by-season statistics).
  To use this:
  1. Select Edit|Add new season
  2. Add a season for the last year of the player(s)
  3. Select Edit|Edit season data
  4. Check the "Contains career totals only" option
  5. Click the "Individual stats" button
  6. In the "Full roster" list click <New player>
  7. Enter the career totals for a player who last played in that year
  8. Repeat for other players as necessary
  9. Stats entered will be marked as "Contains career totals only" and considered for individual career records, not individual season records
• Adjust font size for Season/Career report GP-GS column
• Add option to force pagebreak for each player – Individual game-by-game ('style' mode)
• Include On-BasePct and Slugging Pct in Media report tab-stop output
• Include "O" game scorebook (Scoreboard option)
• Add tab stops for reached base streaks in Miscellaneous stats report
• Show game results in Combined stats report (season-to-date mode)
• Sort conference standings by Conf W-L Pct, Most conf wins, fewest conf losses, overall Pct

@Stat_Crew

Version 5.12 (2010)

- New – Career Single-game Highs report for individual players
- New – Prompt to include play-by-play in Game reports|Reports|Boxscore all (NCAA and Newspaper)
- Career Single-game Highs included in Career summaries for individual players, both hardcopy and HTML
- Career All-Time Results and All-time vs. Opponents included in the HTML
- Add Cumes|Situational statistics|Other statistical metrics report (various "interesting" statistics)
- Career report: Add option to include "All years" in HTML setup window
- Add BABPI (batting avg. on balls in play) to Cumes|Situational statistics|Other statistical metrics report
- Add support for national rankings in Career all-time results report
- Add "Last 10" and "Streak" to Standings report (not available in 'StatEdit' mode)
- Add "OB" keyword for "obstruction" – Same as "INT" keyword for "interference", clarifies the narrative text
- Add "AP" keyword for appeal plays. ie: F813 DP AP will show "on appeal" in play-by-play, and
  only the pitcher is credited with an assist
- Improve name sort for three-part names
- Add "Show list of NCAA team codes" button to Reports|XML output – to display reference list of NCAA team codes
- Add "All players" option to Games|Individual Game Highs report selection
- Use extended name in Individual Career Summaries HTML page
- Save separate titles for baseball and softball venues in Career Reports
- Accommodate "runner placed on second" tie-breaker scenario for "Leadoff batter" in Plate appearance breakdown
- Career/Histotical reports: Accommodate display for results when WLT is know, but final score is unknown; in
  own-score/opp-score fields enter "99-0" for a win, "0-99" for a loss, and "99-99" for a tie

Version 5.11 (2009)

- New – Game Viewer access to career statistics (uses Career XML Summaries by player)
- Add Analysis Database Pitch Chart Reports|Total Plate Appearance
- Add print all boxscores function (NCAA and Newspaper)
- Add weather to Pre-Game report
- Add catchers to Line score report
- For Live HTML, add weather to game information section of game status page
- For Live HTML, show additional batter information in "field" display
- Add Analysis Database|Pitch Chart reports
- Add Pinch-hitting Listing to Analysis Database
- Add Opponent Game Highs report
- Implement 'style' mode format for ab-r-h-rbi, po-a-e, ip-h-r-er-bb-so reports
- Implement 'style' mode format for inherited runners report
- Adjust 'style' reports to allow more characters to display in player name
- Show doubleheader indicator in Results report (hardcopy and HTML 'style' formats)
- Indicate neutral site in Game Highs report
- Add support for schedule legend in Career All-Time Results report
- Expand ties for team and individual season and career records in Career reports
- Improve sort for Career reports season statistics summary (sort on average)
- Add Career reports XML summaries (by season) for archive purposes
- Add controls for Career HTML column header color (table-style)
- Accommodate career historical data where games played information was not tracked
- Add "All" line to Individual Career Summary for "prior team" statistics totals
- Include roster files in the pack/unpack functions
- HTML output: Add handling for "special" characters in player names

@Stat_Crew

Version 5.10 (2008)

• New – Style format for Season and Career reports
• Table-style format career HTML output
• Automatically swap home/visitor colors in live HTML when neutral site=H
• Improve directory prompts for: import/export, pack/unpack, copy HTML to disk, backup/restore
• Add menu item for TAS Zip backup/restore in Windows Utilities
• Analysis database listings of outfield assists and double plays
• Capability to insert graphic images in to the header area of hardcopy 'style' reports
• Season reports: Roster report added to sort by uni# or name, 'style' and XML format
• Individual game-by-game report: Add position, on-base pct and slugging pct information
• In-game Scoring: Allow entry of home run hit location + inside-the-park description in the format "HR location IP"
• In-game Scoring: Add weather field in notes section of boxscore
• Game reports: Display "Weather" field in notes section of boxscore
• Game XML: Add "nitegame" and "weather" attributes to the <venue> tag
• Career reports: Adjust individual career summaries report to exclude prior school stats from rankings section
• Career reports: Adjust history names list report to exclude prior school seasons
• Live HTML: Optionally display game info within sponsor text – (Add a line in the sponsor text file with the tag <info/>)
• Game reports: Insert images in the title area; Display|Style report options|Images to include
• Live game HTML: Automatically reverse "visitor" and "home" colors when Game info|Neutral site = "H"

Version 5.9 (2007)

• New – Game reports: Style reports for Composite, Newspaper and NCAA boxscore, play-by-play and situational stats
• Allow for HTML generation of current "Include games" settings for all reports (for both Team and Conferrence)
• Use extended names for player links index to individual career summaries (HTML)
• Utilities "import game" function changed to pull the team name from the Master List
• Add message text to the game status page of the live HTML
• Add uniform numbers to the Lineup card window
• Display opponent name in upper case for home games on Schedule/Results and Combined Stats reports
• Game Viewer: Implement method to automatically resize viewer window at startup
• Game Viewer: Allow for "http" access to game, season and career XML files via the Internet

Version 5.8 (2006)

• New – Stylesheet format for live HTML stats with TAS Live
• Career summary all-time, single-season rankings
• Career all-time records vs opponents
• Roster name format functions (upper, mixed, first-last, last-first)
• Support for season-to-date statistics in game XML output
• Import games list sort by date
• Table-style format for post-game web pages
• Career category ordinal rankings (1., 2., etc.)
• Prompt team name spelling on roster import
• Conference career change TeamID and delete team functions
• Line score uses extended player names
• Add pitch sequence data to game XML output
